Subject: Expression of Interest – Entry-Level Data Analyst Roles

Dear [Hiring Manager Name / HR Team],

I have been following [Company Name]'s work in analytics with great interest and am writing to express my enthusiasm for potential entry-level Data Analyst positions within your analytics team.

As an aspiring Data Analyst trained in Python, SQL, MS Excel, and data visualization tools, I specialize in translating raw datasets into structured, easy-to-read business reports. I have built practical projects focused on automated data processing and query optimization.

Even if there are no immediate open vacancies listed for this role, I would welcome the opportunity to connect and discuss how my technical skills and proactive drive can assist your team's upcoming project deliverables. I have attached my resume for your review.

Sincerely,

Leo B Polackal
