Subject: Submission of Data Analytics Portfolio – Leo B Polackal

Dear [Recipient Name / Selection Committee],

Please accept this document and the attached portfolio as a formal presentation of my projects and technical capabilities in Data Analytics.

Inside this portfolio, you will find detailed documentation of entry-level analytics projects I have executed, highlighting key competencies in:

- **Exploratory Data Analysis (EDA):** Performing data wrangling, missing value treatment, and descriptive statistics using Python (Pandas, NumPy).
- **Database Querying & Extraction:** Writing structured SQL queries involving joins, aggregations, and subqueries to extract business insights.
- **Data Visualization & Reporting:** Designing clear, interactive dashboards and visual charts in MS Excel and Python to convey key metrics to non-technical stakeholders.

Each project details my analytical methodology, problem-solving framework, and quantitative findings. You may also view my code repositories directly via my LinkedIn profile link.

I look forward to discussing how my analytical skills can support [Company Name]'s analytics goals.

Sincerely,

Leo B Polackal
